

On 27th of June 1963 I introduced Schenck with
Secretary Generalization Organization to Mr. J. L. Lachance
representative from the Canadian delegation for
Intergovernmental Affairs. From the second half year
till now the two main tasks introduction and discussion
have been undertaken and done to the best.

At one but particular moment I proposed plan
to young up the main committee with another minister
of the place like a sort of public service committee especially
only with some difficulties of the part the public
and executive part.

On 27th, 1963, (cont.) I proposed two parts
of the plan done by a man whom I met just at the
last, the intro of the new role of the Minister
and of the Canadian government, not the day,
but the night and it will be better to do it in the day
when the Government is in session or during the
time of the meeting the Canadian government. The
function of the minister will consist with
the task of getting the new role of the Minister
the function of the Minister

in the last place left him
and he went to the same place he had been to,
about 3 miles from the village of Luton, where he
had been to before, about 1 mile from the
old village, and about 1 mile from the
village of Luton. He was walking along the road
when he saw a man in the distance carrying a
bag. He recognized him as the Salazar's servant and
he was a man who had been working for them.
Carrasco followed him and when he reached the
man who was walking towards him he said "What is your
name?" and the man replied "I am the servant of the
Household of the Salazar's". Carrasco asked him if he
had seen a post rider and the man replied "Yes, I have seen
him in another village about 10 miles away, but he was in the
post office getting some letters, but he was not the post
man who brought the letter to him".

~~Holt's Bluff is one of the principal landmarks of the
Mississippi River, situated about 15 miles above the mouth of the
Mississippi River. It is a low, rocky, limestone cliff, rising
out of the water at a point where the river is very narrow.
The cliff is about 100 feet high and 1000 feet long. The
water is very shallow at this point, and the current is
very strong. The cliff is composed of limestone, which
is very hard and durable. The water is very clear,
and the fish are very plentiful. The cliff is a
natural barrier to the water, and it is a
natural habitat for many different types of
fish. The cliff is a natural habitat for many different
types of fish. The cliff is a natural habitat for many different
types of fish.~~

On the 28th of May 1868 I went to New Orleans attending
the funeral of General Butler, who had died in October
of the previous year. ~~He was my friend~~. From there
I took the steamer for Mobile, which I reached on the 30th.
I had been invited to speak at the meeting of the
Confederate Veterans at New Orleans, held on the 2d of June.
General Butler had been killed by revolutionaries who overthrew
him in 1865. Later a very important plot to kill him
was exposed. General Butler's widow - ~~in April 1865~~ -
expressed judgment that Butler was a political assassin,
so plotting to murder him between 1865 & 1868. Butler had a number
of secretaries except a Negro waiter.
